Pediatric Immunology Faculty Position in Portland, Oregon

We are seeking for a Pediatric Immunologist to join the Department of Pediatrics at Doernbecher Children’s Hospital, Oregon Health & Science University (OHSU) in Portland, Oregon.

The Brody Borlaug Endowed Professorship was established by the Borlaug family in honor of their son who lost his battle to a rare primary immunodeficiency. The professorship intends to recruit and retain a pediatric immunologist with the following characteristics:

• Board certified or board-eligible in Pediatric Allergy & Immunology
• Focus in clinical immunology and expertise in primary immunodeficiency disorders
• Expertise in management of newborns identified as having abnormal newborn screening for primary immunodeficiencies.
• Able to work with a multidisciplinary team of pediatricians, bone marrow transplant and infectious disease specialists.
• Able to work with teams beyond regional boundaries.
• Eager to grow the Doernbecher immunology program serving the missions of clinical care, research and education.

Doernbecher Children’s Hospital at OHSU is a regional center providing care for children in Oregon and nearby states in the region. It also serves as a referral center for children requiring specialty care from remote states such as Alaska and Hawaii. The Northwest Regional Newborn Screening Program performs screening of newborns from Oregon, Idaho, Nevada, New Mexico, Alaska, Hawaii, Navajo Nation, Guam and Saipan. Doernbecher specialists serve as the primary consultants for this program. Within the first 3 years of inception, the program has had one of the highest national rates of detection of primary immunodeficiencies.

The Immunology program will work closely with the Pediatric Bone Marrow Transplant program at Doernbecher. The Pediatric BMT program performs about 50 transplants per year for malignant and nonmalignant disorders, including primary immunodeficiencies. Pediatric BMT is one of the components of the Northwest Marrow Transplant Program at OHSU, Doernbecher and Legacy, which performs more than 250 transplants per year. The Pediatric BMT program at Doernbecher is a center of excellence, ranking in the top 5th percentile in survival outcomes for pediatric BMT in the United States. The program is an active participant in collaborative research efforts and an active member of the Pediatric BMT Consortium, the BMT Clinical Trials Network and the Pediatric Immunodeficiency Transplant Consortium.

Portland, Oregon is a beautiful city in the Pacific Northwest. Our city prides itself of fostering a culture of diversity and inclusion. Opportunities for outdoor living are endless. Our community strives in the concept of life and career balance.
